

Mid-West CAD's CADLearning Enterprise is your own private learning portal to customize and monitor learning paths for everyone in the group. Each user has full access to the extensive tutorial library and use of the Plugin. Your custom portal will provide you with insight into your users assessments with the ability to track and report activities and goals.

Portal Setup

- Private CADLearning portal setup for your company, including unique URL
- Branding the CADLearning portal with your company logo, images, blocks and menus
- Creating and assigning administrator logins and SSO connections as needed

Content Resources

- All available CADLearning content, including 12-36 months of updates
 - CADLearning courses, guides and interactive e-books
 - Overall knowledge and skills assessments for all users, including 100 pre-hire assessment tokens
 - Closed captions, video transcripts and exercise file downloads

Learning Delivery

- Worldwide access to CADLearning content for unlimited users via web, mobile and CADLearning plugin
- Build custom playlists based on quiz and search results
- Unlimited storage for custom learning content

Reporting and Analytics

- Detailed user activity reports for video views and assessment attempts
- Admin dashboards and automated reports
- Data feeds for existing client reporting platforms and tools (ERP, Tableau, Domo etc.)
